AMES 1, LLC
ALASKA NATIVE COMPANY

OUR CAPABILITIES OVERVIEW

As the COVID-19 virus continues to spread, AMES1 is committed to the health and wellbeing of our communities and federal clients. For the safety and protection of your employees, customers and their families, we offer sanitizing services for businesses, property managers and residential homeowners to reduce the risk of exposure to the virus. AMES1's sanitation protocol includes preventive and decontamination services.

HOW WE WORK

OSHA certified AMES 1 professionals will arrive on-site to perform your sanitation service wearing proper safety gear to include PPE and respirator masks.

WHAT'S IN A PROTOCOL

Our cleaning protocols have been vetted by hygienists from around the country and reflect the most effective virus neutralization and removal methods known. Further, as we learn more from the CDC and others, our protocols are modified to reflect the current best practices.

THE SERVICES WE OFFER

Preventative cleaning (in areas with no known exposure to the virus) includes sanitation and mechanical cleaning of horizontal surfaces and common touch points such as doorknobs, computer keyboards and operational plumbing fixtures with microfiber cloths and an EPA-approved disinfectant solution.

Decontamination (in areas with known or suspected exposure to the virus) includes:

- Fogging of EPA-approved disinfectant through the duct system
- Fogging of the work area volume with an EPA-approved disinfectant to force airborne contaminants to settle on flat surfaces
- Sanitization and mechanical cleaning included in the Preventative service

WHEN WE WORK

AMES1 can perform sanitation services in your facility when personnel after standard business hours or while all employees are working remotely.

We recommend everyone follow general safety recommendations and the advice of medical professionals regarding the prevention of infections.
